

Talvenner til 9

Navn: _____ Dato: _____

Find det tal, der mangler, og skriv det i den stiplede cirkel. De to dele skal tilsammen give det store tal.

1

A number bond diagram with a large circle at the top containing the number 9. Two lines connect it to two smaller circles below. The left circle contains the number 0, and the right circle is dashed for the student to write the missing number.

2

A number bond diagram with a large circle at the top containing the number 9. Two lines connect it to two smaller circles below. The left circle contains the number 1, and the right circle is dashed for the student to write the missing number.

3

A number bond diagram with a large circle at the top containing the number 9. Two lines connect it to two smaller circles below. The left circle contains the number 2, and the right circle is dashed for the student to write the missing number.

4

A number bond diagram with a large circle at the top containing the number 9. Two lines connect it to two smaller circles below. The left circle contains the number 3, and the right circle is dashed for the student to write the missing number.

5

A number bond diagram with a large circle at the top containing the number 9. Two lines connect it to two smaller circles below. The left circle contains the number 4, and the right circle is dashed for the student to write the missing number.

6

A number bond diagram with a large circle at the top containing the number 9. Two lines connect it to two smaller circles below. The left circle contains the number 5, and the right circle is dashed for the student to write the missing number.

7

A number bond diagram with a large circle at the top containing the number 9. Two lines connect it to two smaller circles below. The left circle contains the number 6, and the right circle is dashed for the student to write the missing number.

8

A number bond diagram with a large circle at the top containing the number 9. Two lines connect it to two smaller circles below. The left circle contains the number 7, and the right circle is dashed for the student to write the missing number.

9

A number bond diagram with a large circle at the top containing the number 9. Two lines connect it to two smaller circles below. The left circle contains the number 8, and the right circle is dashed for the student to write the missing number.

10

A number bond diagram with a large circle at the top containing the number 9. Two lines connect it to two smaller circles below. The left circle contains the number 9, and the right circle is dashed for the student to write the missing number.
