

Match the Blocks

Name: _____ Date: _____

 Circle the blocks that show the number.

1

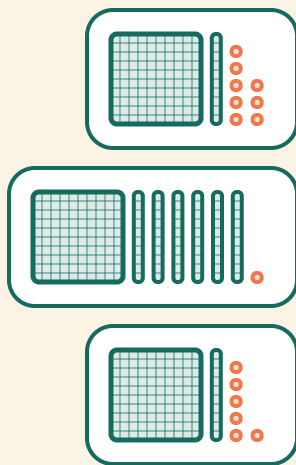

111

Three base ten blocks are shown, separated by a vertical dashed line. Each block consists of a 10x10 grid and a vertical column of 10 small circles. The first block has 100 small squares in the grid and 10 small circles in the column. The second block has 100 small squares in the grid and 1 small circle in the column. The third block has 100 small squares in the grid and 100 small circles in the column.

2

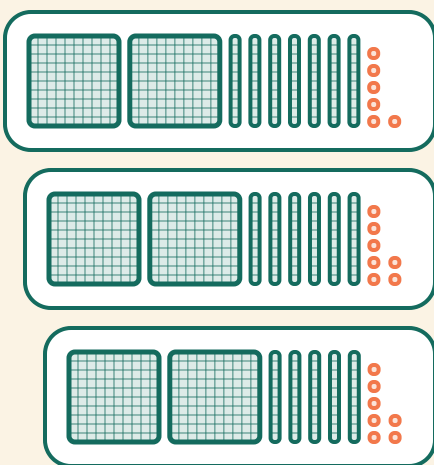

116

Three base ten blocks are shown, separated by a vertical dashed line. Each block consists of a 10x10 grid and a vertical column of 10 small circles. The first block has 100 small squares in the grid and 6 small circles in the column. The second block has 100 small squares in the grid and 10 small circles in the column. The third block has 100 small squares in the grid and 100 small circles in the column.

3

267

Three base ten blocks are shown, separated by a vertical dashed line. Each block consists of a 10x10 grid and a vertical column of 10 small circles. The first block has 200 small squares in the grid and 7 small circles in the column. The second block has 200 small squares in the grid and 60 small circles in the column. The third block has 200 small squares in the grid and 60 small circles in the column.
