

How Animals Adapt

Name: _____ Date: _____

Write the letter of the animal each sentence tells about in its box; one animal is left over.

Its wings are flippers: it swims fast but cannot fly.

Its big front teeth cut down trees to build its home in the water.

Its long trunk sucks up water and picks up food.

Its huge beak picks fruit far out on thin branches.

Its strong, sharp beak drills holes in tree trunks.

Its hump stores fat, so it can go a long time without food.
