

# Number Walls: Find the Missing Brick

Name: \_\_\_\_\_ Date: \_\_\_\_\_

One bottom brick is missing. Find it, then build the whole wall.

1

Diagram 1: A pyramid of 6 bricks. The top row has 1 brick (dashed). The middle row has 2 bricks: the left one is dashed, and the right one is solid with the number 3. The bottom row has 3 bricks: the left one is solid with the number 2, the middle one is dashed, and the right one is solid with the number 2.

2

Diagram 2: A pyramid of 6 bricks. The top row has 1 brick (dashed). The middle row has 2 bricks: the left one is solid with the number 6, and the right one is dashed. The bottom row has 3 bricks: the left one is dashed, the middle one is solid with the number 2, and the right one is solid with the number 1.

3

Diagram 3: A pyramid of 6 bricks. The top row has 1 brick (dashed). The middle row has 2 bricks: the left one is dashed, and the right one is solid with the number 5. The bottom row has 3 bricks: the left one is solid with the number 2, the middle one is solid with the number 1, and the right one is dashed.

4

Diagram 4: A pyramid of 6 bricks. The top row has 1 brick (dashed). The middle row has 2 bricks: the left one is solid with the number 4, and the right one is dashed. The bottom row has 3 bricks: the left one is dashed, the middle one is solid with the number 1, and the right one is solid with the number 2.
