

Number Walls to 10

Name: _____ Date: _____

Each brick is the sum of the two bricks under it. Build every wall to the top.

1

A number wall diagram with three levels. The base level has three solid bricks with numbers 1, 2, and 5. The middle level has two dashed bricks, each spanning the width of two base bricks. The top level has one dashed brick spanning the width of all three base bricks.

2

A number wall diagram with three levels. The base level has three solid bricks with numbers 4, 1, and 3. The middle level has two dashed bricks, each spanning the width of two base bricks. The top level has one dashed brick spanning the width of all three base bricks.

3

A number wall diagram with three levels. The base level has three solid bricks with numbers 4, 2, and 1. The middle level has two dashed bricks, each spanning the width of two base bricks. The top level has one dashed brick spanning the width of all three base bricks.

4

A number wall diagram with three levels. The base level has three solid bricks with numbers 3, 2, and 2. The middle level has two dashed bricks, each spanning the width of two base bricks. The top level has one dashed brick spanning the width of all three base bricks.

5

A number wall diagram with three levels. The base level has three solid bricks with numbers 1, 3, and 3. The middle level has two dashed bricks, each spanning the width of two base bricks. The top level has one dashed brick spanning the width of all three base bricks.

6

A number wall diagram with three levels. The base level has three solid bricks with numbers 2, 2, and 3. The middle level has two dashed bricks, each spanning the width of two base bricks. The top level has one dashed brick spanning the width of all three base bricks.
