

Number Walls: Find the Missing Brick

Name: _____ Date: _____

One bottom brick is missing. Find it, then build the whole wall.

1

Diagram 1: A pyramid of 10 bricks. The top row has 1 brick. The second row has 2 bricks. The third row has 3 bricks, with the rightmost brick containing the number 5. The bottom row has 4 bricks, with the first, second, and fourth bricks containing the number 2. The third brick in the bottom row is missing, indicated by a dashed outline.

2

Diagram 2: A pyramid of 10 bricks. The top row has 1 brick. The second row has 2 bricks. The third row has 3 bricks, with the rightmost brick containing the number 4. The bottom row has 4 bricks, with the first, second, and fourth bricks containing the number 1. The third brick in the bottom row is missing, indicated by a dashed outline.

3

Diagram 3: A pyramid of 10 bricks. The top row has 1 brick. The second row has 2 bricks. The third row has 3 bricks, with the leftmost brick containing the number 6. The bottom row has 4 bricks, with the first, third, and fourth bricks containing the number 2. The second brick in the bottom row is missing, indicated by a dashed outline.
