

Picture Puzzles

Name: _____ Date: _____

★ Look at the first pair. Circle what completes the second pair the same way.

Illustration 1: A small rocket in a square box is followed by a colon, then a larger rocket in a square box, followed by a double colon, then a small blue bus in a square box, followed by a colon, then a dashed square box containing a question mark. To the right are three circles: the first contains a larger blue bus, the second contains a smaller blue bus, and the third contains a yellow excavator.

Illustration 2: A large ship in a square box is followed by a colon, then a smaller ship in a square box, followed by a double colon, then a yellow excavator in a square box, followed by a colon, then a dashed square box containing a question mark. To the right are three circles: the first contains a pink canoe, the second contains a smaller yellow excavator, and the third contains a larger yellow excavator.

Illustration 3: A small purple airplane in a square box is followed by a colon, then a larger purple airplane in a square box, followed by a double colon, then a small rocket in a square box, followed by a colon, then a dashed square box containing a question mark. To the right are three circles: the first contains a larger rocket, the second contains a yellow and red train, and the third contains a smaller rocket.

Illustration 4: A small yellow and red train in a square box is followed by a colon, then a larger yellow and red train in a square box, followed by a double colon, then a small green car in a square box, followed by a colon, then a dashed square box containing a question mark. To the right are three circles: the first contains a white ambulance, the second contains a smaller green car, and the third contains a larger green car.
